CARDINAL
ENERGY LTD.

Exploitation Engineer

We are looking for an Exploitation Engineer to be a member of our team. The successful candidate will be responsible for the development of multiple assets. Responsibilities include identifying growth opportunities, optimization of EOR schemes, long-range planning, working with a multi-disciplinary team on budgeting for these assets, and supporting A&D activities.

The successful candidate would have the following experience and skills:

Requirements:

- Have a minimum 10 years of experience.
- Has been exposed to oil reservoirs in Western Canada and familiar with the regulatory frameworks in both Alberta and BC.
- Identify and develop new exploitation opportunities and reservoir depletion strategies on existing and prospective assets:
  - increase recovery in established mature reservoirs
  - improve well productivity of underperforming wells with workover and stimulation recommendations; reactivations; re-entries; recompletions
- Evaluate drill prospects; perform risk analysis and type curve analysis.
  - Have a detailed understanding of geologic concepts in relation to Exploitation & Reservoir Engineering
  - Familiar with current drilling and completion operations and technologies.
  - Complete economic analysis and provide input on capital allocation decisions.
- Manage drill programs and budgets and operations by interacting with Cardinal's drilling consultants.
- Ability to identify opportunities:
  - Monitor industry and competitor activity and identify opportunities for new technology applications.
  - Evaluate area consolidations, farm-ins, and land acquisition.
  - Improve area netback.
- Assist and support in developing the BU's short and long term capital and operating plans
  - Budget forecasting, providing variance analysis, updating accruals and tracking relevant KPIs.
- Familiar with field operations. Have a good working understanding of Facilities and Production Engineering concepts.

Additional:

- Effective working in a multi-disciplinary team.
- Assist / coordinate government applications as required.
- Prepare and deliver presentations to executive management team.
- Have an attention to detail with an ability to do a reasonableness checks.
- Willing to make the occasional trip to the field (well reviews, project scoping, meeting stakeholders, etc.)
- Participate in Cardinal's Health, Safety and Environmental program.
- Experience with the following software is advantageous:
    - Schlumberger Oil Field Manager (OFM)
    - IHS Accumap and/or geoSCOUT
    - PVR and/or Verdazo
    - ValNav
    - S&P Global Harmony (decline analysis)
    - Power BI and Data Analytics
    - Familiar with dynamic modelling (CMG IMEX/GEMS/STARS)
